

Using a GPS

AT 11:30 am Loders children went to find out what a GPS is.

We all got a go on the GPS to see what it was like. After we'd all had a go we had to type in a code and it took us to a bit of card that said another code. There were six codes and when we had all six we had to go back to the classroom to do a crossword till the other groups had finished looking.

After we had finished the GPS map we went round to Dancing Ledge following the GPS route and then we had to run back for some food.
