

NIGHT WALK

FireworksText.com

On Monday 23rd April at 9:30pm, year 5s, 6s and the staff, went on a night walk around the outskirts of Leeson House. We started off at Leeson House and walked out of the back gate.

Then we walked through the first field. At the end of it, we climbed over a stile to get to the next field.

After a while Mr Kite stopped to talk about how our eyes work in the night, and in the daytime. The rods work at night and the cones work during the day.

Soon, a very funny memory came up. It was the gully that Mr Kite had fallen in the year before! He told us that we shouldn't laugh if he fell in it again this year. Still, we laughed whilst we were going past.

A while later, we stopped again to go off by ourselves through the final field of the night. Mr Kite and Anna Willmore then went off and Mrs Sutton stayed with us and counted to 100. She was counting so that we could make sure that Anna and

Mr Kite were at their places, ready for us to come (on our own.)

Soon the year 6s went off one by one. The followers were the year 5s. Most of us got across on our own. It was soon then, that we had supper and went to bed. It was a brilliant night out.
